

Model rounds presentation

Persons to be present: Doctors / Nurses / Other health care providers

1. Demographics-

- Baby's name
- Birthweight
- Gestation,
- Day of life

2. Current diagnosis-

E.g. Pneumonia, sepsis, feed intolerance etc

3. Brief history-

- Significant maternal illness,
- Cause of delivery- maternal/ fetal indication ,
- Intrapartum - route & risk of sepsis,
- Resuscitation required, immediate problems after delivery e.g. Distress, low sugars

4. Current status - general status

- Nutrition- IVF or feeds, volume, route, weight change, mothers Lactation, supplements
- Metabolic- temperatures, sugar, electrolytes, ABG, signs of dehydration
- Respiratory problem- distress score, SPO2, oxygen/ respirator support requirements, any subjective change
- Infection - Antibiotic days, sepsis work up, culture, probable site of infection. Plan for antibiotic change/ continuation, IV access - duration
- Hemodynamic- CFT, signs of shock, urine output, HR, peripheral pulses, tummy toe difference, BP, precordial activity in preterm
- Neurological- Activity, AF, seizures, few reflexes,
- Hematological- CBC, signs of bleeding/ pallor
- KMC- **eligibility, initiation, maintenance**, duration,
- Plan of discharge/ shift to step down or mother side
- Counseling details _____

Model handover/ take over (morning every 24 hours)

Persons to be present: Nurse to Nurse; Nurse to Doctor

1. Demographics- Baby's name, birthweight, gestation, day of life
2. Presenting complaints & Current diagnosis- E.g. Pneumonia, sepsis, feed intolerance etc
3. New issues in the last 24 hours- apnea, seizures, shock, bleeding, oliguria etc
4. Change in management over last 24 hours- antibiotic change, fluid volume, feeds, inotropes, bolus, etc.
5. Current status- hemodynamic stability - vitals over last 8 hours, last sugar, temperature, current respiratory support (CPAP / FiO2), urine output, current treatment plan
6. Investigations – pending investigations to be done, reports to be followed.
7. Mother's status- Which ward mother is admitted, lactation status, **KMC [readiness, counseling, demonstration, return-demonstration, initiation, maintenance, problems]**, any other problems
8. Anticipatory plan - next inotrope, anticonvulsant, fluid change, procedures planned,
9. IV line / feeding tubes / endotracheal tube.
10. Social- family issues about referral, DAMA etc

Model handover/ take over (every shift change)
